Professional Summary

A technically adept fresher with a strong foundation in modern web technologies and DevOps principles. Proficient in building and deploying full-stack applications using JavaScript/TypeScript and containerizing them with Docker and Kubernetes. Experienced in developing real-time systems with WebSockets and designing scalable architectures. Ready to tackle complex engineering challenges.

Education

Ramdeobaba College of Engineering — B.Tech, Electronics and Computer Science

Year of Graduation: 2027 | CGPA/Percentage: 8.68

Projects

- Excalidraw** | TypeScript, React, WebSocket, WebRTC, Redis
Built a real-time collaborative whiteboard with multi-user sync, session persistence, and scalable architecture.
- Zapier Workflow Automation** | Zapier, Node.js, APIs, Kafka
Automated workflows integrating third-party apps; created custom extensions for API integrations.
- Crypto Exchange** | Next.js, PostgreSQL, Redis, Docker, Kubernetes
Designed a crypto exchange simulator with real-time order matching and containerized deployment.

Technical Skills

Languages: C++, JavaScript, Java, TypeScript, Python, Rust, Bash Scripting

Frameworks/Libraries: React, Next.js, Node.js, NextAuth, gRPC

Databases & ORM: PostgreSQL, MongoDB, Redis, Prisma, Kafka

DevOps & Cloud: Docker, Kubernetes, AWS, GCP, CI/CD, Turborepo

Tools/Technologies: Git, GitHub, Postman, Prometheus, Grafana
